Todos Santos

The small town of Todos Santos (recently declared a Magical Village) was founded as a Jesuit mission center in 1730. The place is a fertile oasis close to the Pacific coast that receives fresh water from the nearby *Sierra de la Laguna*. In colonial times, due to the availability of fresh water and thanks to a cooler and moister climate brought by the Pacific, many subtropical crops such as sugarcane, mangos and cotton were already thriving and thus creating considerable wealth that is still reflected by the mansion around the main square. Today Todos Santos is still a quiet subtropical oasis close to the ocean and maybe because of this it attracted a substantial number of both Mexican and foreign artists offering their work to the visiting tourists. Last but not least it's home to the well-known Hotel California that is sometimes associated with the Eagles' song of the same name - but that's another story!

Historic Mining Villages

The villages of San Antonio and El Triunfo (declared recently a Magical Village) are located in the outskirts of the *Sierra de la Laguna* and have been important gold and silver mining centers since the 18th century. The several concert pianos and other musical instruments brought to the area at that time are now gathered and preserved at the Museum of Music under the direction of a well-known local artist.

Restored historical mansions and of course the remains of the old mining compound featuring an intact 46 m (151 ft.) high brick chimney designed by Gustav Eiffel are other attractions that invite you to stroll around this picturesque village with a fascinating history.
